

Introduction to Applied Behavior Analysis

Megan Martins PhD, BCBA-D is an Assistant Professor with the Autism Programs at the Center for Development and Disability

This presentation will focus on discussing the ways that ABA is used to develop important skills in students with autism.

Participants will learn some of the common vocabulary as well as strategies.

Megan Martins PhD, BCBA-D is an Assistant Professor with the Autism Programs at the Center for Development and Disability. She is a Clinical Psychologist and a Doctoral-Level Board Certified Behavior Analyst. She attended graduate school at Rutgers, The State University of New Jersey, completed her pre-doctoral fellowship at the University of California-Los Angeles (UCLA), and a postdoctoral fellowship at the University of Colorado-Denver. Her clinical expertise is in assessment and intervention for individuals with Autism

Spectrum Disorder (ASD) specifically in the areas of early intensive behavioral intervention, adapting empirically supported interventions for individuals with ASD, co-morbid psychiatric conditions, and parent training and interventions to improve family functioning in families with a child with a developmental disability.
