**CDD will not provide ADOS-2 Manuals. It is required that participants bring an ADOS-2 Manual to the workshop.*

Manuals may be purchased online at www.wpspublish.com

ADOS-2 Introductory Clinical Workshop

The ADOS-2 is used for assessing and diagnosing Autism Spectrum Disorders across ages, developmental levels, and language skills. The second edition includes revised algorithms, a new comparison score for Modules 1-3, updated protocols with clearer administration and coding guidelines. The ADOS-2 introductory/clinical training workshop will use a lecture format and live demonstrations to introduce the basic principles of administering and scoring ADOS-2 modules 1 through 4 and provide an essential step toward competence in using the ADOS-2 in everyday clinical practice or for research purposes. This training does not include the Toddler Module Clinical Workshop.

Learning Objectives: Following the course, participants will be able to

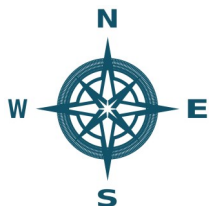

- Identify the key features of the ADOS-2 approach, including the rationale for the approach and how it enhances Autism assessment
- Describe use of the ADOS-2 for operationalizing diagnostic criteria for Autism Spectrum Disorder
- Explain how to select the most appropriate ADOS-2 module
- Identify administration procedures for the ADOS-2
- Demonstrate a basic understanding of how to apply ADOS-2 codes
- Demonstrate a basic understanding of how to score ADOS-2 algorithms
- Identify the psychometric support for the ADOS-2
- Explain issues in the clinical application of ADOS-2 results

Trainer info:

Dr. Courtney Burnette is a clinical psychologist and is the Director of the Clinical Evaluation Services Unit at the Center for Development and Disability. Her primary focus is on screening of young children and diagnostic assessment of individuals of all ages referred for concerns about Autism Spectrum Disorder. Dr. Burnette is the only certified ADOS-2 trainer in New Mexico.
