I. PURPOSE
The purpose of this memorandum of understanding (MOU) is to formalize transition procedures and delineate roles and responsibilities among its agencies in their collaborative efforts to identify, evaluate, and transition children from Early Intervention (Part C) to Preschool Special Education (Part B), Early Head Start/Head Start and/or other community settings. As a group we strive for a cooperative system that provides families with the information, empowerment and support(s) they need to make informed choices and facilitate smooth transitions from one service system to another in accordance with State and Federal regulations. Additionally, we collaboratively learn about the array of services each agency provides, eligibility and access considerations, and the referral process to assure resources are utilized in the most effective manner. Lastly, we come together to collaborate on a continuing system of screening, referral and community health fairs to provide education and referral information to parents.

II. DESCRIPTION OF THE INVOLVED AGENCIES

### INITIAL COMPREHENSIVE EVALUATION FOR PART B

- Part B team reviews current available assessment data (including Part C assessments).
- Part B team determines additional data and assessments needed.
- Part B team conducts initial comprehensive evaluation process in all areas of suspected disability.

**NMAC 6.31.2.10(E) Procedural requirements for the assessment and evaluation of culturally and linguistically diverse children.**

1. Each public agency must ensure that tests and other evaluation materials used to assess children are selected, provided and administered so as not to be discriminatory on a racial or cultural basis and are provided and administered in the child's native language or other mode of communication, such as American sign language, and in the form most likely to yield accurate information on what the child knows and can do academically, developmentally and functionally, unless it is clearly not feasible to select, provide or administer pursuant to 34 CFR Sec. 300.304(c)(1).

2. Each public agency must ensure that selected assessments and measures are valid and reliable and are administered in accordance with instructions provided by the assessment producer and are administered by trained and knowledgeable personnel.

3. Each public agency must consider information about a child's language proficiency in determining how to conduct the evaluation of the child to prevent misidentification. A child may not be determined to be a child with a disability if the determinative factor for that eligibility determination is limited English proficiency. Comparing academic achievement results with grade level peers in the public agency with similar cultural and linguistic backgrounds should guide this determination process and ensure that the child is exhibiting the characteristics of a disability and not merely language difference in accordance with 34 CFR Sec. 300.306(b)(1).

4. Each public agency must ensure that the child is assessed in all areas related to the suspected disability.

5. Policies for public agency selection of assessment instruments include:
   - (a) assessment and evaluation materials that are tailored to assess specific areas of educational need; and
   - (b) assessments that are selected ensure that results accurately reflect the child's aptitude or achievement level.

6. Public agencies in New Mexico shall devote particular attention to the foregoing requirements in light of the state's cultural and linguistic diversity. Persons assessing culturally or linguistically diverse children shall consult appropriate professional standards to ensure that their evaluations are not
discriminatory and should include appropriate references to such standards and concerns in their written reports.

**NMAC 6.31.2.11(A)(3)**
To ensure effective transitioning from IDEA Part C programs to IDEA Part B programs, each public agency must conduct a full and individual initial comprehensive evaluation at no cost to the parent and in compliance with requirements of 34 CFR Secs. 300.300, 300.301, 300.302, 300.304 and 300.305 and other department rules and standards before the initial provision of Part B special education and related services to a child with a disability.

The initial comprehensive evaluation process shall be conducted in all areas of suspected disability.
